

How to use THE IMPLODER

The best effect is to re-cycle the imploded water at least once, i.e. run the water thru the imploder into a container- and re-circulate it thru the imploder. Best if the container is not made of metal, plastic is fine- ceramic better. Normal tap pressure is usually used.

The really compelling results we have consistently seen was when the water was circulated thru The Imploder for 5-8 minutes using a simple pump with normal kinds of household tap pressures - into a non-metal tank of usually 5-10 gallons roughly. Larger tanks would be ok, with perhaps longer circulation time. With that arrangement- we have seen most of the powerful results you see pictured on our web site.

Applications of THE IMPLODER

ON THE FARM

Seed Germination

To increase seed germination success- farmers can simply spray water with the imploder attached onto a hose. If there is access to a "water container" or water tank, simply fill the container / tank (overnight if you wish) with the imploder, then re-run the water thru the imploder directly onto seedlings.

Obviously- running the imploded water thru a sprinkler system is OK- however, the less metal the imploded water comes into contact - the better the results. Using plastic, glass and ceramic is best.

Field crops, Green House, Wineries, Hydroponics, Flower growers etc

Where re-circulating the imploded water is impractical, for convenience and efficiency, sequencing 3 Imploders in a row would be the best approach.

Imploder creates faster growth rate and denser biomass, stronger disease resistant crops, all of which increases the bottom line profits.

Dairy farming, Cattle and Hens

Improves vitality of grass, digestion and assimilation. Increases milk production and quality of meat. Creates healthier eggs and laying performance.

Other presumably less potent water treatments have claimed very significant increases in milk production. We are very pleased to ask dairy farmers to feed TheImploder water to their milking animals, because the solubility increase makes it easier to suspend the nutrients and butterfat in solution. It makes sense the animal can produce more milk with less biological effort.

Compost

Improves vitality of the compost, helps microbes to be activated. Increases the breakdown of compost /manure and the binding of nitrogen.

Rejuvenation of wasteland

Along with the use of "revitalize the soil products", the imploder can help rejuvenate wasteland and deserts. Refer to "Bloom the Desert" project on the "Other developments from the Fractal Field Company" page on our website

OTHER INDUSTRIES

Bio Fuel –Ethanol production

Because it creates quicker fermentation rates. It also enables the water to separate faster, which increases fuel production and 'turn around'

Golf courses, public gardens and landscaping

Because it creates healthier and more radiant looking grass, plants and flowers

Industrial and Farm waste management

Because it increases sedimentation rate it will make sewage treatment more effective and quicker. The separation of water from waste material filtration happens faster e.g. waste management from farms e.g. "run-offs".

Food Technology and health products development

Because it creates more nutritionally rich dense foods. Subtle forces in products such as homeopathic will be stronger.

Aqua Technology –Fish Farms

Makes fish water healthier and resistant to infections. Sludge is quickly broken down

Swimming pools.

We have conducted tests where we ran imploder water for a while every day and noticed the water felt 'silky' - like it was easier to move through it. Also magnetic water treatments commonly see reduction in scale on pipes and certain fungi and algae growth. Since our device is probably the most powerful (in terms of gauss densities alone- not to mention the corrected centripetal spin to absorb that spin densely-from the nozzle) - it is highly likely that we will see even more potent effects on pool and pond waters.

Ice and Snow making Technology

Creates ice and snow quicker, which means you will use less energy, saving much \$\$\$.

RETAIL

Flower shops

Because wilting flowers can be re-vitalized. Flowers/plants watered with Imploded water will LAST LONGER, saving on wastage.

Health spa's and Natural Healing Clinics

Because imploder water feels silkier, and has more 'life force' and 'healing properties'. Because of water de clustering, it hydrates the body better. It helps to 'alkalize' the body.

Fish/aquarium shops

Makes fish tank water healthier and resistant to infections

DOMESTIC

In the kitchen

You can use it for domestic water consumption, as it re-energizes water and increases its ability to hydrate the body. It will reduce the build-up and effects of lime deposits

Note: it does not 'filter the water' of impurities such as chlorine etc. That would need to be done first with a RO filter. However, we are testing to confirm TheImploder increases the rate at which both solids and gaseous pollutants are segregated, sedimented and evaporated.

It tastes and feels like fresh spring water- at a fraction of the cost of bottled water

With The imploded drinking water, people are consistently saying that it tastes 'silky' and they are able to tell the difference every time. This is probably because of the decreased molecular cluster size and related solubility increase. People have reported various health benefits (one Canadian user swears it helped his back problem).

Obviously we cannot claim health benefits until much more testing is done. It is up to the individual to experiment themselves. Even things like returning hair color from grey, which have been reported with various water treatments, makes sense, because increased solubility means more mineral in hair and bones. There could be also benefits for arthritis sufferers.

In the living room/ office

Makes fish tank water healthier and resistant to infections

Keeps your plants strong and healthy.

Place into a water atomizer spray, to refresh yourself.

Pre energize water before filling a humidifier, makes the effect stronger in the room. Use for intensive cleaning

In the bedroom

Say no more!

However, we will: In Traditional Chinese Medicine, the water element controls the kidneys, reproduction organs, will power and libido. If the quality and hydration of water is stronger, your cells and organs receive more energy

In the shower

Install onto your shower water line to have a re energized shower- and the water feels more 'silky'

In the garden

Increase production of the family's garden to save money, and grow healthier plants and flowers. Grow the biggest cabbages in the neighborhood

Well water

It will reduce the effects of lime deposits and 'heavy water'
